

With us you are Number One

ENGEN REFINERY

BEST PRACTICE SHARING COVID 19

PETRONAS

Security Control at entrances

- All employees required to complete HEALTH DECLARATION upon return to work / Business Partners required to complete and hand in at security.
- Security Officers conduct Temperature screening using non touch screening devices.
- Breathalysers checks conducted using paper straws and disposing into allocated waste bins.

The team temporarily removed the turnstile spindles at all the gates to eliminate contact with the metal frame as the employees move through the entry points.

COVID Controls

Lines have been painted at all the permit huts to ensure social distancing while the teams come to have their permits signed.

Innovative ways have been used to install wash up facilities at all permit huts and tents. The team has introduced a foot pedal taps, so no touching of taps is required.

Protocols for using Transport

SHUTTLE SERVICES

- Only one passenger per row and passengers must sit staggered.
- No passenger is allowed in the front seat.
- Driver will be provided with disinfectant to wipe door handles.
- Areas of frequent contact to be disinfected at least once after passengers disembark.

POOL CARS

- Only one person allowed per pool car (van).
- Persons using the common pool bakkie must use disinfectant provided in common areas (such as satellite offices) to disinfect the door handle, gear lever and steering wheel before driving.

CONTACTOR / BUSINESS PARTNER VEHICLES

- Only one person allowed per van or truck.
- If using company shuttle, only one passenger per row and passengers must sit staggered and no passenger in the front seat.
- Contractors/Business Partners to ensure they have disinfecting protocols in place to disinfect the door handle, gear lever and steering wheel before driving.

We encourage everyone to wash hands using soap and water after touching common surfaces.

THANK YOU
